

WITH MUSIC AGAINST TINNITUS

Harmody is being developed by the Dresden-based Startup 'Tech & Life Solutions'.

The principle is based on an interdisciplinary technical research project by the Technische Universität Dresden, at which the founders Martin Spindler and Dr. Matthias Lippmann worked on the first pro-

totype, which produced promising results. First tests with tinnitus patients showed, that the tinnitus strain was hardly noticeable while using the app.

After a break of fifteen minutes the perception of tinnitus noise has still been reduced.

TINNITUS RELIEF

www.harmody.de

HARMONIOUS, SELF-DETERMINED, CUSTOMIZABLE AND ACCESSIBLE ANYWHERE

- Experience individual musical enjoyment
- Control your tinnitus
- Escape from stress
- Improve your performance
- Increase your well-being
- Regain your inner focus

An app for tinnitus sufferers, which specifically embeds tinnitus sound in music in order to enable immediate and lasting relief of tinnitus stress.

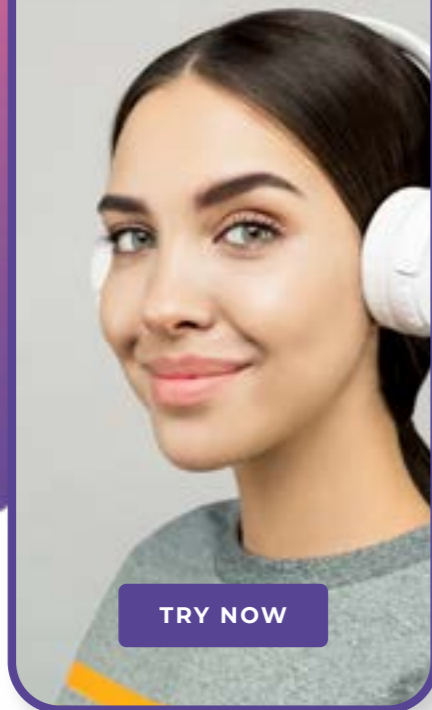

HARMONIZATION EFFECT

Harmody is an audio player for music in everyone's individual taste.

The integrated harmonization effect enables you to cope with the tinnitus easier in everyday life.

While listening to music, the tinnitus noise blurs and is lost in euphony - even at a moderate volume.

LESS TINNITUS - MORE QUALITY OF LIFE

TRY NOW

Discover our app for smartphone and tablet on iOS and Android.

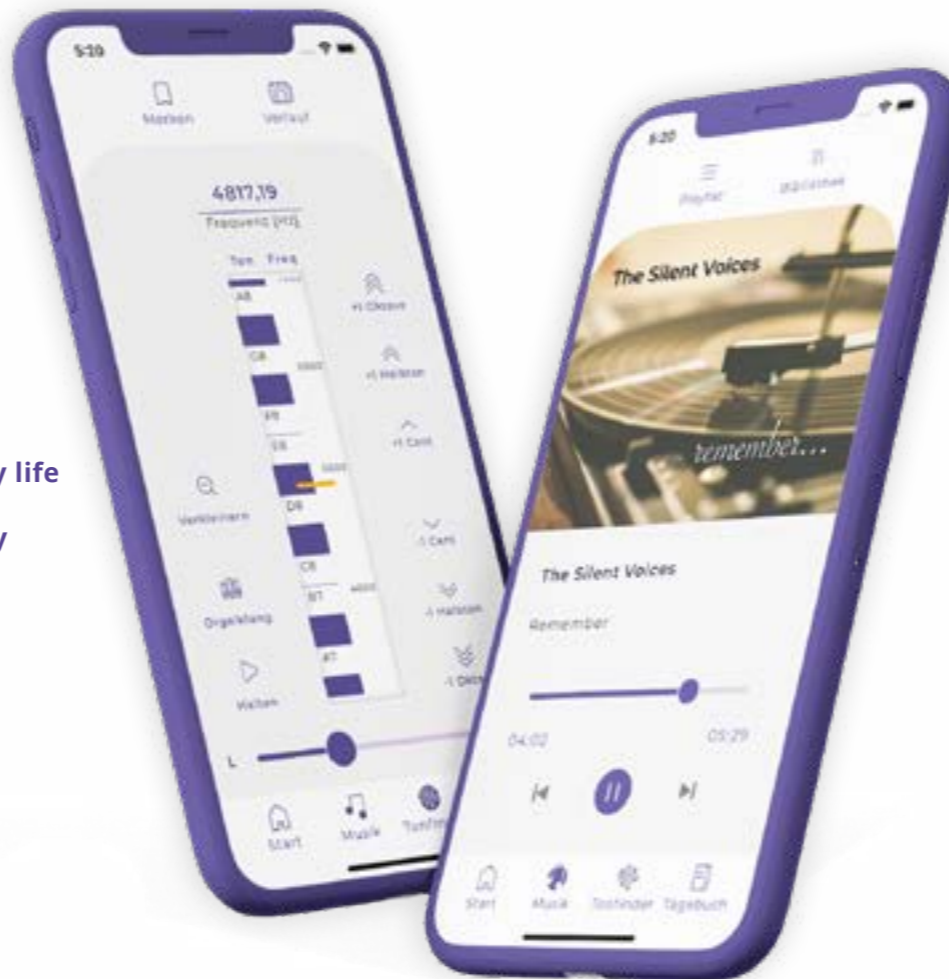

INTEGRATED TINNITUS MATCHING

You can set and adjust your personal tinnitus frequency precisely with the help of a reference tone within the tinnitus matching view of the app. Our patented algorithm analyzes the tonal

characteristic of the desired piece of music, adjusts its pitch automatically and thus brings the music in harmony with the tinnitus sound in real time.

Harmody offers:

- ✓ Immediate effect without training
- ✓ Playing your favorite music
- ✓ Independent accessibility in everyday life
- ✓ High definition, natural sound quality
- ✓ Live interactive pitch correction
- ✓ Efficient tinnitus tone matching

MUSIC PLAYER & DIARY

Once your tinnitus tone is matched, you can play any of your favorite songs in our fully functional audio player. The sound quality and dynamics of the original recordings are preserved.

For a long term observation of your tinnitus relief you can track your progress in a diary before, during and after using harmody.

While listening to music the tinnitus is:

- ✓ Embedded in harmony
- ✓ Surrounded by the music
- ✓ The center of euphony
- ✓ Pushed to the background
- ✓ After effect calms

HARMODY GOALS & MILESTONES

02-2022

Completion of app-development

03-2021

Grant of EU patent „Method and Device for Automated Harmonization of Digital Audio Signal s“

03-2021

Winner of the inventors contest „Genial Sächsisch“ by the newspaper Sächsische Zeitung

09-2020

Start of clinical evaluation at University Hospital „Carl Gustav Carus“ in Dresden

07-2020

Completion of the audio engine

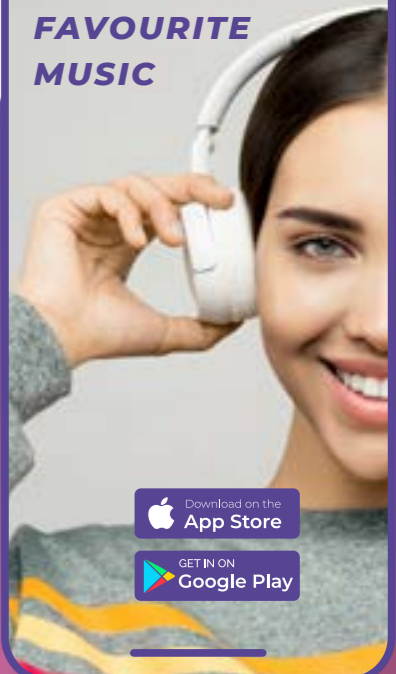

07-2019

Nominated for the Saxony FutureSax Founders Award

07-2019

Founding of Tech & Life Solutions GmbH

ESCAPE FROM TINNITUS WITH YOUR FAVOURITE MUSIC

Our plan:

- Reimbursement
- Establishing cooperations
- Available throughout Europe
- Connectivity with music streaming services
